**PETITION UNDER 37 CFR § 1.47(a)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

This Petition is filed for the purpose of having the Office accept a new declaration in the present application without being executed by William R. Lehman, who is a named inventor.

An application for patent may be accepted when one of the inventors refuses to execute an oath or declaration, provided the requirements of 37 CFR § 1.47(a) are satisfied. These requirements are as follows:

1. All of the available joint inventors must execute an oath or declaration on their own behalf as required under 37 CFR § 1.63;
2. The available joint inventors must execute an oath or declaration on behalf of the inventor who is refusing to sign;

3. A petition must be filed which includes proof of the pertinent facts relating to the inventor's refusal to execute an oath or declaration;

4. The fee under 37 CFR § 1.17(h) must be filed to accompany the petition;  
and

5. The last known address of the refusing inventor must be provided.

All the requirements of 37 CFR § 1.47(a) have been satisfied.

**A. First Requirement: Executed Declarations of Available Inventors.**

The present application was originally filed naming a single inventor, William R. Lehman, with an executed Declaration. However, there actually were two inventors, William R. Lehman and David A. Stout. As a result, a Request to Correct Inventorship is attached hereto as Attachment A and a newly executed Declaration and Power of Attorney is attached hereto as Attachment B, which has only been signed by Mr. Stout.

Mr. Lehman executed a Declaration as a sole inventor in the application on December 14, 2001, and which was filed with the application on December 17, 2001.

**B. Second Requirement: Signing on Behalf of Non-Signing Inventor.**

Under MPEP § 409.03(a), a declaration signed by the other joint inventor with the signature block of the non-signing inventor left blank may be treated as having been signed by all the available joint inventors on behalf of the non-signing inventor. It is respectfully submitted that the blank signature block for Inventor Lehman appearing in the Declaration and Power of Attorney executed by Inventor Stout (Attachment B) is sufficient to satisfy the requirement of MPEP § 409.03(a) of having the available joint inventor sign on behalf of the non-signing inventor.

**C. Third Requirement: Proof of Refusal to Sign.**

This paper satisfies the requirement of filing a petition requesting that the present Petition and application papers be accepted without an oath or declaration executed by Inventor Lehman. Under Rule 47(a), the petition must be accompanied by proof of Inventor Lehman's refusal to execute an oath or declaration in this application. Proof of this refusal is set forth below.

The invention disclosed and claimed in the present application resulted from work performed by the named Inventors. With Inventor Stout's knowledge, Inventor Lehman filed a patent application (Application Serial No. 10/015,583) covering this invention on April 25, 2000, however, it was without Inventor Stout's knowledge that Inventor filed the application naming only Lehman as a sole inventor. Subsequently, on December 14, 2001, Lehman assigned 50% of his rights in the application and any patent(s) issuing therefrom to Stout, as evidenced by the Recordation of Assignment, dated December 17, 2001 (Reel 012406, Frame 0719), attached hereto as Attachment C. On April 17, 2002, Lehman and Stout each assigned their entire right, title and interest in the application and any and all patent(s) issuing therefrom to American Safe Air, Inc., as evidenced by the Recordation of Assignment (Reel 012877, Frame 0402), dated May 8, 2002, attached hereto as Attachment D.

On September 23, 2004, an Office Action rejecting all currently pending claims over newly cited art was mailed. Upon review of the Office Action and file history, it was determined that the inventorship of the application needed to be corrected to add Mr. David A. Stout and that the Office Action could be overcome by filing a new Declaration and Power of Attorney and a Declaration of Prior Invention signed by both Mr. Lehman and Mr. Stout. Mr. Stout has signed both documents.

However, Mr. Lehman has not, even though they were personally presented to him on October 22, 2004.

In fact, Inventor Lehman personally indicated that he refused to execute the declaration papers that were delivered to him in on October 22, 2004. Evidence of this refusal is attached in Attachment E, which is a Statement from Mr. B. E. Irby who, as an agent for the assignee in the present application, personally meet with and presented the Declarations and other necessary application papers to Inventor Lehman on October 22, 2004. As Mr. Irby's Statement indicates, Inventor Lehman personally informed Mr. Irby that he refused to sign any of the above-identified Declarations presented to him by Mr. Irby on October 22, 2004.

It is respectfully submitted that the foregoing remarks and the attachments to this paper are sufficient as proof of Inventor Lehman's refusal to execute an oath or declaration in connection with the present application.

**D. Fourth Requirement: Petition Fee.**

The fee required under 37 CFR § 1.17(h) is attached.

**E. Fifth Requirement: Last Know Address.**

The last known address of Inventor Lehman is:

William R. Lehman (#128276)  
Cummins Prison  
P.O. Box 500  
Grady, AR 71644

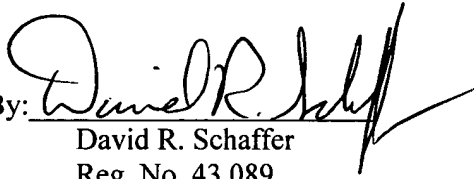

**F. Summary.**

All requirements under 37 CFR § 1.47 are believed to have been satisfied. Accordingly, it is earnestly solicited that the inventorship of the present application be corrected without an executed oath or declaration of William R. Lehman.

To the extent necessary, Applicants petition for an extension of time under 37 CFR § 1.136. Please charge any shortage in fees due in connection with this application, including extension of time fees, to Deposit Account No. 50-1165 (Attorney Docket No. T3392-907823) and credit any excess fees to the same Deposit Account. A duplicate copy of this paper is enclosed herewith for internal authorization purposes.

designed to provide the safest mail sorting area possible. Mail handlers with proper training and supervision can maintain a safe work environment and contain all known biological threats received in the mail, thereby keeping your operation running.

The system is designed to remove large dust particles first, then the smaller dangerous particles of biological agents followed by carbon absorption of chemical agents. It will provide a high level of protection in most known circumstances. It is ideal for setting up a safe mail room in any office.

The ChemBio Airwash is a HEPA filtration system that creates a down-flow of air on a mail sorting surface, that leads directly into two HEPA filters. Possible particulate hazards such as Chemicals or Bio-Matter from incoming mail are forced into the HEPA filter. Each filter has 100 ft of HEPA filter surface area to allow maximum airflow. The clean air out is ducted to create a negative pressure in the room (so any contaminants that do end up in the room, stay there to be drawn into the ChemBio Airwash).

For maximum protection, mail is directed to a sealed room with a ChemBio Airwash system in use. The operator must be trained in basic aseptic techniques and wear proper PPE. Any mail would be inspected and opened directly on the ChemBio Airwash's downdraft HEPA sorting surface.
